

Replication Notes and Output for ‘What Politicians Don’t Know Can Hurt You: The effects of information on politicians’ spending decisions’ American Political Science Review

Ryan Jablonski

14 September 2023

Contents

Replication Notes	2
Effects of the Need Information Treatment	4
Conditional Logit Estimates of the Need Information Treatment (Figure 8, Table S8-S9, Figure S15, Table S35, Table 2)	4
Linear Probability Model Estimates of the Need Information Treatment (Figure S8)	9
Heterogenous Effects of the Need Information Treatment (Figure S4)	12
Additional Pre-Registered Tests of the Need Information Treatment (Figure S7)	14
Effects of the Voting Information Treatment	16
Conditional Logit Estimates of the Voting Information Treatment (Figure 10, Table S12-S13, Figure S17, Table S37, Table 4)	16
Linear Probability Model Estimates of the Voting Information Treatment (Figure S10)	21
Heterogenous Effects of the Voting Information Treatment (Figure S6)	23
Estimates with Alternative Coding of Voting (Tables S29 and S30)	25
Effects of the Aid Information Treatment	33
Conditional Logit Estimates of the Aid Information Treatment (Figure 9, Table S10-S11, Figure S16, Table S36, Table 3)	33
Linear Probability Model Estimates of the Aid Information Treatment (Figure S9)	38
Heterogenous Effects of the Aid Information Treatment (Figure S5)	40
Other Treatment Effect Estimates	42
Interactions between Treatments (Tables S31, S32, S33)	42
Multiple Comparison Corrections (Figure S3, Tables S17, S18, 19)	43
Interaction Effect Plot (Figure 11, Tables S14, S15, S16)	45
Interaction of Information Treatments with Transparency Treatments (Tables S26, S27, S28)	48
Politician Knowledge and Updating	53
Correlates of Politician Knowledge (Table S34)	53
Summary of Quiz Answers (Figure 3 and Figure S14)	54
Questions on the Usefulness of Information (Figures S11, S12, S13)	55
Attrition, Compliance and Bias	56
Attrition Statistics (Table S42, S43, S44, S45)	56
Tests of Desirability Bias (Tables S20, S21, S22)	59
Treatment Compliance Tests (Figures S23, S24, S25)	68

Politician Visits (Figure 2, Table S1)	70
Politician Learning (Figure 1)	72
Head Teacher Prioritization of School Needs (Figure S19)	73
Power Analysis (Figures S1 and S2)	74
Summary Statistics	75
Number of Maps Receiving Different Combinations of Transparency and Information Treatments (Table S47)	75
Local Councillor Sample Statistics (Table S38)	75
MP Sample Statistics (Table S39)	75
Variable Summary Statistics (Figures S40-S41)	76
Correlation Matrix (Figure S18)	85
Statistics for CONSORT Diagram (Figure 6)	86
Association between School Characteristics and School Selection (Figure 7, Tables S2, S3, S4, S5, S6, and S7)	87

Replication Notes

The code in this folder generates all the tables and figures from Ryan Jablonski and Brigitte Seim “What Politicians Don’t Know Can Hurt You: The effects of information on politicians’ spending decisions” in the *American Political Science Review*. The full output of the replication code is appended to this file.

This code is designed to be compiled with rMarkdown. It was originally run on RStudio Version RStudio 2022.07.1+554 with R 4.2.0 for Windows 10 x64. All data has been anonymized to protect respondents.

The main replication file is `GenerateTablesFigures.rmd`. In order to replicate the results, you must first change the “`working_dir`” variable in this file to the directory of the replication files.

Note that the results markdown file will differ in size and resolution from the main text. For final source files see the `./Output` folder.

This replication code relies on the following source files:

1. `GenerateTablesFigures.rmd` This file is an rMarkdown file to generate all tables and figures
2. `./data/labels.csv` this file contains labels for all variables
3. `./data/all_withcovariates.csv` this is a school-level dataset containing all variables used for the main treatment analysis
4. `./data/c_withcovariates.csv` this is a school-level dataset containing all variables used for the councillor only treatment analysis
5. `./data/c_withcovariates_withattritted.csv` this is identical to the file above, but also includes attritted respondents. It is used for attrition analysis in the SI.
6. `./data/mp_withcovariates.csv` this is a school-level dataset containing all variables used for the MP only treatment analysis
7. `./data/mp_withcovariates_withattritted.csv` this is identical to the file above, but also includes attritted respondents. It is used for attrition analysis in the SI.
8. `./data/citizen_survey.csv` this file contains survey responses from citizens in the catchment area of a sample of schools included in this experiment. Among other things, it contains spatial data on patterns of politician visits to constituents.

9. *./data/citizen_survey.csv* this file contains survey responses from citizens in the catchment area of a sample of schools included in this experiment. Among other things, it contains spatial data on patterns of politician visits to constituents.
10. *./data/headteacher_survey.csv* this file contains survey responses from head teachers in the catchment area of a sample of schools included in this experiment. Among other things, it contains responses to a question about teacher prioritization of school needs.
11. *./data/how_useful_survey_questions.csv* this file summarizes politician responses to an open ended question about the usefulness of information in the experiment.
12. *./data/followupsurvey.csv* this file contains politician responses to a follow-up phone survey about constituent information. It is used to generate Figure 1.
13. *./data/lc_schools_all.csv* this file contains details of schools which were eligible to be included in the experimental sample for councillors. It is used to generate sample summary data.
14. *./data/mp_schools_all.csv* this file contains details of schools which were eligible to be included in the experimental sample for MPs. It is used to generate sample summary data.
15. *./data/power_sim.csv* this file contains power simulations for the main treatment effect.
16. *./data/power_sim_interactions.csv* this file contains power simulations for interactions between treatments.

For questions about this replication contact Ryan Jablonski at r.s.jablonski@lse.ac.uk.

Effects of the Need Information Treatment

Conditional Logit Estimates of the Need Information Treatment (Figure 8, Table S8-S9, Figure S15, Table S35, Table 2)

This table shows the results of a linear fixed-effect regression of school covariates on the proportion of correct answers about each school included in the post-experiment quiz. The outcome variable is the share of correct questions about each school.

Summary of Quiz Answers (Figure 3 and Figure S14)

VotePP	0.099	0.299	Incumbent would vote for PP party (survey)
VoteUDF	0.116	0.321	Incumbent would vote for UDF party (survey)
Pop Density	0.558	0.798	Average number of persons per grid cell in ward/constituency (WorldPop)
Incumbent Percent	0.418	0.215	Percent votes at polling station for incumbent (Malawi Electoral Commission)
Incumbent Votes	525.091	405.09	Votes at polling station for incumbent (Malawi Electoral Commission)
Aid Treatment	0.49	0.5	Equals one if a map was assigned the aid information treatment and zero otherwise
Need Treatment	0.484	0.5	Equals one if a map was assigned the school need information treatment and zero otherwise
Voting Treatment	0.504	0.5	Equals one if a map was assigned the percent votes information treatment and zero otherwise
Need Knowledge	0.449	0.255	Average score in school knowledge questions (survey)
Voting Knowledge	0.244	0.304	Average score in political knowledge questions (survey)
Aid Knowledge	0.128	0.229	Average score in donor knowledge questions (survey)
Aid Good Types	-0.002	1	A count of the number of types of aid projects delivered by donors at this school (donors)
Information Usefulness	1.75	0.561	A 0 to 2 scale indicating how useful the information was to the respondent (survey)
Learning from Experiment	0.474	0.5	Whether the respondent indicated that they learned something from the experimental interaction (survey)
Frequency of Donor Interaction	1.346	1.152	A 0 to five scale indicating how frequently incumbents interact with donors (survey)
Student to Teacher Ratio	75.044	33.824	Number of students per teacher in a school (Ministry of Education EMIS Statistics)
Student to Classroom Ratio	126.952	158.201	Number of students per class in a school (Ministry of Education EMIS Statistics)
Temporary Classroom Ratio	0.475	0.969	Number of temporary to permanent classrooms in a school (Ministry of Education EMIS Statistics)
School Need Index (ward)	-0.077	1.78	Index of school need within the ward (Ministry of Education)

School Need Index (constituency)	-0.056	1.826	Index of school need within the constituency (Ministry of Education)
School Need Index	-0.056	1.826	Index of school need within the constituency or ward (Ministry of Education)
Aid Project Count	-0.007	0.993	Number of aid projects at school (various donors)
Test Question Classes	0.479	0.5	Whether the respondent could correctly identify a school with the least number of permanent classes
Test Question Votes	0.377	0.485	Whether the respondent could correctly identify a school with the least percentage of votes for the incumbent
Test Question Enrollment	0.618	0.486	Whether the respondent could correctly identify a school with the highest number of students
Test Question Projects	0.238	0.426	Whether the respondent could correctly identify a school with the most donor projects
Test Question Enrollment Specific	0.252	0.434	Whether the respondent could correctly identify the range of enrollment at a chosen school
Test Question Votes Specific	0.11	0.314	Whether the respondent could correctly identify the range of percent votes at a chosen school
Test Question Aid Projects Specific	0.018	0.12	Whether the respondent could correctly identify one or more donors with projects on a map
Radio Transparency	0.518	0.5	Treatment telling incumbent that decisions would be broadcast on radio
Donor Transparency	0.533	0.499	Treatment telling incumbent that decisions would be shared with donors
Transparency Treatment	0.799	0.401	Either transparency treatment
Incumbent Percent	0.418	0.215	Percent votes at polling station for incumbent (Malawi Electoral Commission)
Log Distance from Hometown	2.751	0.814	Log distance in km (+1) from incumbent's self-reported hometown
Heard of Tearfund	0.125	0.33	Equals one if the incumbent has heard of Tearfund and zero otherwise (survey)
Worked with Tearfund	0.051	0.22	Equals one if the incumbent has worked with Tearfund and zero otherwise (survey)
Victory Margin	0.156	0.345	Victory Margin at Polling Station for incumbent (Malawi Electoral Commission)

VoteMCP	0.333	0.472	Incumbent would vote for MCP party (survey)
VoteDeclined	0.147	0.354	Incumbent declined to declare party vote (survey)
VotePP	0.048	0.213	Incumbent would vote for PP party (survey)
VoteUDF	0.088	0.284	Incumbent would vote for UDF party (survey)
Pop Density	0.611	0.901	Average number of persons per grid cell in ward/constituency (WorldPop)
Incumbent Percent	0.488	0.216	Percent votes at polling station for incumbent (Malawi Electoral Commission)
Incumbent Votes	657.79	555.811	Votes at polling station for incumbent (Malawi Electoral Commission)
Aid Treatment	0.502	0.5	Equals one if a map was assigned the aid information treatment and zero otherwise

Need Treatment	0.507	0.5	Equals one if a map was assigned the school need information treatment and zero otherwise
Voting Treatment	0.522	0.5	Equals one if a map was assigned the percent votes information treatment and zero otherwise
Need Knowledge	0.475	0.306	Average score in school knowledge questions (survey)
Voting Knowledge	0.241	0.295	Average score in political knowledge questions (survey)
Aid Knowledge	0.122	0.222	Average score in donor knowledge questions (survey)
Aid Good Types	-0.007	1	A count of the number of types of aid projects delivered by donors at this school (donors)
Information Usefulness	1.552	0.676	A 0 to 2 scale indicating how useful the information was to the respondent (survey)
Learning from Experiment	0.271	0.444	Whether the respondent indicated that they learned something from the experimental interaction (survey)
Frequency of Donor Interaction	0.771	0.97	A 0 to five scale indicating how frequently incumbents interact with donors (survey)
Student to Teacher Ratio	72.719	33.563	Number of students per teacher in a school (Ministry of Education EMIS Statistics)
Student to Classroom Ratio	135.787	262.25	Number of students per class in a school (Ministry of Education EMIS Statistics)
Temporary Classroom Ratio	0.492	0.913	Number of temporary to permanent classrooms in a school (Ministry of Education EMIS Statistics)
School Need Index (ward)	-0.014	1.805	Index of school need within the ward (Ministry of Education)
School Need Index (constituency)	-0.013	1.88	Index of school need within the constituency (Ministry of Education)
School Need Index	-0.014	1.805	Index of school need within the constituency or ward (Ministry of Education)
Aid Project Count	-0.006	1.002	Number of aid projects at school (various donors)
Test Question Classes	0.51	0.5	Whether the respondent could correctly identify a school with the least number of permanent classes
Test Question Votes	0.31	0.463	Whether the respondent could correctly identify a school with the least percentage of votes for the incumbent
Test Question Enrollment	0.613	0.487	Whether the respondent could correctly identify a school with the highest number of students
Test Question Projects	0.213	0.41	Whether the respondent could correctly identify a school with the most donor projects
Test Question Enrollment Specific	0.304	0.46	Whether the respondent could correctly identify the range of enrollment at a chosen school

Test Question Votes Specific	0.173	0.378	Whether the respondent could correctly identify the range of percent votes at a chosen school
Test Question Aid Projects Specific	0.031	0.166	Whether the respondent could correctly identify one or more donors with projects on a map
Radio Transparency	0.506	0.5	Treatment telling incumbent that decisions would be broadcast on radio
Donor Transparency	0.5	0.5	Treatment telling incumbent that decisions would be shared with donors
Transparency Treatment	0.759	0.428	Either transparency treatment
Incumbent Percent	0.488	0.217	Percent votes at polling station for incumbent (Malawi Electoral Commission)
Log Distance from Hometown	2.366	0.848	Log distance in km (+1) from incumbent's self-reported hometown
Heard of Tearfund	0.801	0.399	Equals one if the incumbent has heard of Tearfund and zero otherwise (survey)
Worked with Tearfund	0.229	0.42	Equals one if the incumbent has worked with Tearfund and zero otherwise (survey)
Victory Margin	0.249	0.327	Victory Margin at Polling Station for incumbent (Malawi Electoral Commission)

Correlation Matrix (Figure S18)
